## PREFACE

The QUARTERLY CUMULATIVE INDEX MEDICUS is published four times each year, each temporary number—bound in paper—covering periodicals received during a three months period, each permanent number—bound in cloth—covering the periodicals received during a half year. Issues are published as soon as possible after the completion of the period they cover. The dates of publication are approximately May, August, November and February.

Paper bound copies (those appearing in May and November) should be discarded when the permanent cloth bound issue for the same volume is received.

On pages 62-79 will be found a list of the journals indexed.

The main index is preceded by a list of new books, alphabetized as to authors, followed by a subject classification of the same material.

**Since 1945 it has been impossible to adhere strictly to the usual schedule of publication because of postwar and labor difficulties.**

## PREFACE

LE QUARTERLY CUMULATIVE INDEX MEDICUS est publié quatre fois par an: chaque numéro temporaire—relié en papier—comprend les journaux médicaux reçus pendant un trimestre et chaque numéro permanent—relié en toile—ceux d'un semestre. Les numéros sont publiés aussitôt que possible après l'écoulement de la période à laquelle ils s'appliquent. Les dates de publication sont approximativement les mois de Mai, d'Août, de Novembre et de Février.

Les numéros reliés en papier (publiés aux mois de Mai et de Novembre) sont à rejeter comme superflus quand on reçoit les numéros permanents du même volume reliés en toile.

Une liste des publications faisant l'objet de l'index se trouve aux pages 62-79.

L'index principal est précédé d'une liste de livres nouveaux arrangés par ordre alphabétique du nom des auteurs, suivie d'une classification par sujets.

---

## VORWORT

DER QUARTERLY CUMULATIVE INDEX MEDICUS erscheint viermal im Jahre, jede zeitweilige Nummer—geheftet in Papier—enthält die Zeitschriften die im Laufe von drei Monaten ankommen, jede permanente Nummer—gebunden in Leinen—enthält die Zeitschriften die im Laufe eines halben Jahres ankommen. Die einzelnen Ausgaben erscheinen sobald wie möglich nach dem Zeitabschnitt dessen Literatur sie enthalten. Die Zeitpunkte des Erscheinens sind ungefähr: Mai, August, November und Februar.

Die in Papier gehefteten Ausgaben, welche im Mai und November erscheinen, sollten ausgeschaltet werden sobald die permanenten, in Leinen gebundenen Ausgaben desselben Bandes eintreffen.

Auf den Seiten 62-79 ist ein Verzeichnis der klassifizierten Zeitschriften.

Dem Hauptverzeichnis geht eine Liste neuer Bücher voran, zuerst in alphabetischer Ordnung nach Autoren und dann in einem Sachverzeichnis.

## PREFAZIONE

Il QUARTERLY CUMULATIVE INDEX MEDICUS si pubblica quattro volte all'anno; ogni numero provvisorio—legato alla rustica—corrisponde alle riviste ricevute durante un periodo di tre mesi, mentre ogni numero permanente—legato in tela—corrisponde alle riviste ricevute durante un periodo di sei mesi. I numeri si pubblicano alla scadenza del periodo che essi comprendono. Le date di pubblicazione sono approssimativamente Maggio, Agosto, Novembre e Febbraio.

I numeri legati alla rustica (che si pubblicano in Maggio e Novembre) dovrebbero essere scartati appena arrivano i numeri permanenti del medesimo volume rilegati in tela.

Da pagina 62 a 79 è riportato un elenco delle riviste che formano l'oggetto dell'indice.

L'indice principale è preceduto da un elenco di libri nuovi, prima disposto in ordine alfabetico per autori, e poi a seconda delle materie.

---

## PROLOGO

El QUARTERLY CUMULATIVE INDEX MEDICUS se publica cuatro veces al año, conteniendo cada número temporáneo—encuadernado a la rústica—los periódicos recibidos durante un trimestre y cada número permanente—encuadernado en pasta de lino—los periódicos recibidos durante un semestre. Los números se publican a la mayor brevedad posible después del vencimiento del período que cubren. Las fechas de publicación son aproximadamente Mayo, Agosto, Noviembre y Febrero.

Los números encuadernados a la rústica (que se publican en Mayo y Noviembre) deben desecharse tan luego como se reciban los números permanentes del mismo volumen encuadernados en pasta de lino.

En las páginas 62-79 se encontrará la lista de los periódicos que están incluidos en el índice.

El índice principal está precedido por una lista de libros nuevos arreglados por orden alfabético de nombres de autores, seguida por una lista de los mismos libros clasificados por materias.

# INSTRUCTIONS FOR USE OF QUARTERLY CUMULATIVE INDEX MEDICUS

This periodical indexes itself alphabetically, both as to author and subject entries.

**THE COMPLETE BIBLIOGRAPHIC REFERENCE IS TO BE FOUND AFTER AUTHOR'S NAME ONLY, EXCEPT FOR UNSIGNED ARTICLES WHEN THE COMPLETE TITLE IN THE ORIGINAL LANGUAGE AS WELL AS A TRANSLATION WILL BE FOUND UNDER THE SUBJECT ENTRY.**

Following is a typical citation for an author entry covering an original contribution:

**GIRAUD, P., and BERNARD, R.,** Le traitement actuel du kala azar, Presse méd. **54**: 725-726, Nov. 2, '46

The citation gives the names of the authors, the title of the article in the original language if English, French, German, Spanish, Italian or Portuguese; in translation if in other languages. Then follow the abbreviation of the title of the periodical, the volume in black-face type, paging, month (day of month if a semimonthly, semiweekly or weekly publication) and year, in order named, e. g., Presse méd. **54**:725-726, Nov. 2, '46

When there are two or more authors for an article the complete entry as shown appears only under the name of the first author. Under the name of each of the joint authors a cross reference is made to the original author entry, thus:

**BERNARD, R.: See GIRAUD, P., jt. auth.**

Russian names appear with various spellings in medical literature; for instance, the name Chernikov, V. V., may appear as Tschernikov, W. W., Tschernikoff, W. W., or Tchernikow, W. W. In this index the spelling followed in Russian publications will be maintained, and a cross reference to the original will be made from unusual variations.

All subject entries are in English. The original title is often inverted or shortened to emphasize significant points or it may be expanded to indicate more clearly the actual content of the article. The author entry cited above appears as follows in the subject entry:

**LEISHMANIASIS**
**therapy,** *di*amidine with or without organic antimony compounds in modern therapy of kala-azar, [P. Giraud & R. Bernard] Presse méd. **54**: 725-726, Nov. 2, '46

In searching for a specific article, the author entry should be consulted if the name of the author is known, since the complete bibliographic reference is to be found after the author's name only. If the subject only is known, the articles should be sought first under the specific word in the title that defines the subject, e. g., **ANEMIA; ENDOMETRIUM; HEMIPLEGIA; etc.**

Chemical compounds with prefixes denoting numbers of atoms or radicals, or their positions, such as mono, di, tri, ortho, meta and para, are alphabetized under the essential constituents, the prefixes being ignored as far as alphabetical arrangement is concerned. For instance, *p*-Aminobenzenesulfonamide appears in the Index under "A" as ***p*-AMINOBENZENESULFONAMIDE,** and diHydroxyphenylalanine under "H" as ***di*HYDROXYPHENYLALANINE.** Likewise, figures representing the position of radicals or side chains are also ignored in the alphabetical classification. Exceptions to this rule include trade names and names of official drugs as, **ACID, trichloroacetic; TETRACHLOROETHYLENE.**

Articles with titles equivalent to the capitalized heading appear immediately beneath the subject entry with the name of the author only; then unclassified titles in alphabetical order precede the articles grouped under subclassifications. Standard subheadings for diseases and organs are as follows:

**FOR DISEASES**

| | | |
|---|---|---|
| **blood in** | **heredity** | **pathology** |
| **complications and sequels** | **history** | **prevention** |
| **diagnosis** | **immunity** | **prognosis** |
| **epidemiology and statistics** | **in infants and children** | **therapy** |
| **etiology and pathogenesis** | **metabolism in** | **transmission** |
| **experimental** | **mortality** | |

**FOR ORGANS**

| | | |
|---|---|---|
| **abnormalities** | **echinococcosis** | **physiology** |
| **abscess** | **embryology** | **roentgenography** |
| **absence** | **examination** | **rupture** |
| **anatomy and histology** | **foreign bodies** | **surgery** |
| **blood supply** | **gangrene** | **syphilis** |
| **calculi** | **hemorrhage** | **tuberculosis** |
| **cancer** | **infarction** | **tumors** |
| **cysts** | **innervation** | **ulcers** |
| **diseases** | **pathology** | **varix** |
| **diverticula** | **perforation** | **wounds and injuries** |

Literature referable to organs and regions of the body is classified under the particular organ or region, e. g., **BRAIN, abscess; STOMACH, cancer; FEMUR, fractures.**

Articles on the action of a drug in general or the method of administering it are indexed under the name of the drug; but articles on the action of a drug in a particular disease are indexed under the disease; e. g., an article on the action of quinine is indexed under **QUININE**, while an article on quinine therapy of malaria is indexed under **MALARIA, therapy** with a cross reference from **QUININE, therapy.**

Numerous cross references are supplied from specific names of organs, from diseases, from eponyms, etc.

While the general scheme of indexing in this publication classifies the literature according to a specific arrangement, some subjects are, of necessity, grouped under broad, general headings. A representative list follows:

**Acid**
**Anesthesia**
**Apparatus**
**Arteries**
**Bacteria**
**Contracture**
**Fistula**
**Hospitals**
**Jurisprudence, Medical**
**Medicine**
**Muscles**
**Nerves**
**Obituaries**
**Paralysis**
**Reflex**
**Sarcoma**
**Tumors**
**Vital Statistics**
**Workmen's Compensation and Insurance**
